Who Should Join?

CARGO HANDLING

VISION: Provide leading-edge cargo handling solutions that support a sustainable and seamless transportation system.

The approach to our vision ensures that cargo handling solutions are developed and designed to complement the seamless nature of freight transportation and make possible partnerships that support highways, railroads, waterways, seaports, and pipelines to achieve the nation's goal of economic well being through a sustained competitive transportation system.

MISSION: Actively pursue industry-driven enhancements to cargo handling that increase productivity to improve customer service by:

- 1) Addressing solutions to cargo handling systems and design.
- 2) Addressing the development and application of innovative technologies.
- 3) Seek ways to increase productivity.
- 4) Support national defense transportation requirements.

Why Join The CHCP?
Membership in the Program

Allows new technology to be explored using combined resources of a public/private partnership.

Provides the opportunity to conduct high priority cargo handling projects on a cost-shared basis.

Allows members to share in the results of evaluations of new products.

Provides the strength of an industry group when making recommendations to state, federal, and international organizations.
